ABDUL RAFAY

MERN STACK DEVELOPER

SUMMARY

I am Full Stack Developer specializing in JavaScript-based web applications with hands-on experience in React, Next.js, and MERN stack development. Demonstrated ability to deliver scalable, high-performance platforms, including e-commerce and financial systems. Strong emphasis on clean architecture, API integration, and building reliable, user-centric solutions.

WORK EXPERIENCE

CODSOFT

Frontend Developer

- Engineered responsive, user-friendly web interfaces using JavaScript, React, and Next.js, focusing on performance, accessibility, and maintainable frontend architecture.
- Executed API and backend service integration while enhancing application speed, SEO, and cross-browser compatibility, alongside maintaining existing systems and resolving production issues.

Fiverr

Mern Stack Developer

- Architected real-time dashboards and API-driven workflows to improve data accuracy, system visibility, and operational efficiency.
- Optimized backend integrations and secure data exchange processes, ensuring application stability, search visibility, and continuous feature enhancements.

PROJECTS

FATIMAZ-E-COMMERCE PLATFORM

- Delivered a fully dynamic e-commerce web application featuring admin and user panels, order management, and inventory tracking with real-time product and stock updates.
- Architected a scalable, state-driven frontend structure that enhanced application responsiveness, performance, and cross-device compatibility.
- <https://fatimaz.vercel.app/>

Retail Ledger Web Application

- Built a cloud-based financial automation platform supporting unlimited users, expense tracking, and vendor/customer balance management.
- Implemented real-time dashboards and state-managed API integrations using Axios and Redux, reducing manual errors and improving financial data accuracy..
